UCSD Health Lighting Retrofit Project
University of California, San Diego

Program Name / Project Descriptions

Project 1: Lighting Retrofit in Hospitals
Determine the most cost efficient lighting retrofit plan for the two UCSD Health campuses in Hillcrest and La Jolla.

---

Project 2: Greenhealth Awards Application
Help complete the Energy, Climate, and Green Building sections of the application.

Achievements / Results / Outcomes

Lighting Retrofit in Hospitals
Long term comparison of electricity, maintenance, and installation costs of various bulbs and lighting fixtures, while taking into account of ballast and driver costs.

Greenhealth Awards Application
Successfully submitted the application.

Lessons Learned / Intern Experience

Overview of lessons learned...

Successful Strategies:
1. Online research for unfamiliar topics
2. Hands-on and in-person experiences are most effective for learning
3. Ask questions

Recommendations for Improvement / Program Expansion:
1. Program should be longer than 10 weeks to allow sufficient time to complete the projects
2. Scope of Work not helpful, the questions were too limiting and may not apply to all projects
3. More hands-on opportunities

Acknowledgements:
Thank you to Anna Levitt, Gulmira Mustapaeva, Hannah Campi, and Liz Fitzpatrick for guidance and opportunities.
