By testing the previous Green Room Certification Process and gaining the advice from RA’s, residents, and housing staff I was able to modify & add on to the Green Room Certification Program:

• Combined past presentations into one Outreach Presentation
• Added more steps to fine tune the process
• Created Logos and Flyers for Publicity
• Created Surveys and forms for participants
• University High School Outreach – Helped high school students learn more about saving energy for the Energize Schools Energy Conservation Competition

Successful Strategies:
1. Communication – By talking to RA’s, residents, and housing staff I was able to gain important insight for the Green Room Certification Program.
2. Planning – this program has a lot of content, so planning out each step of the Green Room Certification Program really helped me break things apart into manageable steps to work on.

Recommendations for Improvement / Program Expansion:
1. Gain experience and insight to find areas to improve on. The Green Room Certification Program is still really new to UCI so there are definitely a lot that could be added/improved to the current program.
2. Multiple types of incentives haven’t been really tested yet so identifying which type of incentive is the most effective would be a great insight to know.

Owen Yang

Owen is a 2nd-year Computer Science and Engineering Student at UCI. As a Computer Science and Engineering student he hopes to solve real-world problems such as environmental issues. As a current Energize Colleges Intern he aims to learn more about energy efficiency and sustainable lifestyle choices. He also loves working on DIY projects such as origami projects or just building anything mechanical that moves. In his free time, he likes to play bassoon, play soccer, and sleep.

Acknowledgements

Site supervisors: Rachel Harvey, Rachel Pennington | Campus Organizations: Global Sustainability Resource Center and UCI Housing | Special thanks to everyone who gave me feedback and advice for this program, as well as the previous Energize Colleges intern Paola Granados and Middle Earth Residential Advisor Payal Goswami.
